

DANISH FEDERATION OF EXPLOSIVES ENGINEERS

Dansk Sprængteknisk Forening (DSF)

Profile

AIM

The aim of DSF is to unite manufacturers, suppliers, contractors, professional technicians and businessmen in the fields of blasting technique and explosives to promote the member's interests within the field of explosion technology and engineering.

DSF is a member of the European Federation of Explosives Engineers (EFEE), an international federation with the same goals.

DSF held the presidency of EFEE from 1995-1996 and again from 2014-2016

MEMBERS

DSF has about 50 members with key interest in the following areas:

- Stone quarrying
- Building contractors
- Demolition contractors
- Technical advisers
- Distributors
- Insurance companies
- Public services (Ministry of Justice, Police, safety etc.)

Companies, public services etc. within Denmark, Greenland and the Faroe Islands can be full members, while individuals and companies from foreign countries can be adopted as associate members without professional rights.

ACTIVITIES

- Participation in meetings and conferences within EFEE

- Publishing DFEE guidelines and recommendations concerning:
 - Vibration in blasting technique
 - Cautious rock blasting
 - Safety regulations
 - Blasting certificates
 - SHE aspect
 - Tables and formulas
- Arranging meetings of members
- Publication of newsletters
- Discussion of proposals from members
- Contact with authorities (Ministry of Justice, Police, safety authorities etc.)

OTHER BUSINESS

DSF organized THE FIRST INTERNATIONAL CONCRETE BLASTING CONFERENCE in Copenhagen in June 1992.
